

Komory chłodnicze ISARK

- jakość i estetyka
- łatwy transport i montaż
- niska cena
- niskie zużycie energii
- łatwość konserwacji

Komory chłodnicze i mroźnicze ISARK są przeznaczone dla hurtowni i detalicznych sklepów z żywnością oraz restauracji. Są idealnym rozwiązaniem wszędzie tam, gdzie nie wystarczają już standardowe pojemniki chłodnicze.

Komory produkowane są w 52 standardowych modelach, zapewniających przestrzeń składowania w granicach 2,3–20 m³.

Konstrukcja urządzenia, wykonana z paneli (grubość 85 mm) ze stali galwanizowanej, pomalowana jest białą farbą. Warstwę izolacyjną stanowi wypełniająca panele pianka poliuretanowa.

Komory ISARK w wersji chłodniczej nie mają podłogi, natomiast w wersji mroźniczej podłoga stanowi standardowe wyposażenie (panele podłogowe wykonane są z PVC).

Drzwi, w jakie wyposażone są komory ISARK, pozwalają na swobodny dostęp do przestrzeni składowania. Otwierane są na zewnątrz, na prawą (standardowo) lub lewą stronę.

Komory chłodnicze bez podłogi
